

Toll scenarios and events

PTV Europe City Map Premium 2022.2H

the mind of movement

Each scenario is caused by a defined event in reality for which different successive event versions may exist. For example, in France a new tariff table would be an event, an estimate on the future toll on secondary highways would be another event. As the knowledge about future tolling schemes increases, new versions of one specific event come into play, each in turn superseding the previous event version. The following document presents all events and event versions for countries with more than just the standard toll tables. The header contains: ISO3COUNTRY-EVENT-EVENTVERSION and the file number in brackets.

Andorra

Andorra January 2021

AND Event 5.1 (TollScenarioID 1)

Content: This scenario contains the most recent tariffs, valid from January 2021. New tariffs for Tunnel d 'Envalira. This scenario replaces the previous 'Andorra January 2019' scenario. Type of calculation: Exact.

Source: Tunnel d'Envalira

Belgium

Belgium January 2022

BEL Event 15.1 (TollScenarioID 1)

Content: This scenario includes the toll charges for trucks from a maximum authorised mass over 3.5 t in the three Belgian regions: Wallonia, Flanders and Brussels. New toll rates valid from 1st January, 2022 for all trucks in Wallonia. Motorways, other main roads and the local road network in Brussels are subject to tolls. Toll charges are calculated based on kilometre factors and depend on road type and further depend on the emission class and total weight of the vehicle. This scenario replaces the previous 'Belgium July 2021' scenario. Type of calculation: By approximation with an average factor per kilometer.
